

CNTAC LaTeX package
New in 2012A

1. New in 2012A:
 - a) Box 3a: added TRAPPIST
 - b) Box 9: Remote observing
 - c) Box 10a: thesis in a Chilean institution
 - d) Box 13: hyperlink can be added using latex command `\href`. (needs latex package `hyperref`). Use only links to catalogs (Simbad, Vizier, NED, etc.)
 - e) Box 14: request for instrument/telescope justification

2. New in 2011B:
 - a) e-mail submission is not supported anymore (you should get an automatic response if you use the old e-mail address). Use instead the web form at http://www.das.uchile.cl/cntac/form_prop_cntac.php
 - b) Upload two files: (1) the complete proposal in PDF format with figures embedded in it. (2) the latex source. We do not need the figures in separate form. The latex file is needed to create spreadsheets automatically.
 - c) You will not be asked to check whether your proposal is in a list. Instead you will get a link to check out that your submitted PDF is in our disk.
